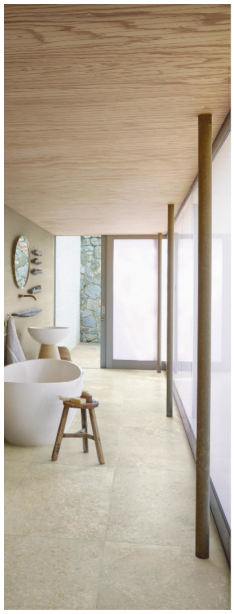
Uniche

Ceramic Stoneware Â· Floor and Wall



OVERVIEW

The beauty of four Mediterranean limestones comes to life once again in a fresh fusion of nature and innovation. By combining natural raw materials, an advanced sustainable production process, and a groundbreaking technology applied to both the structure and surface for the first time, this collection offers a striking visual and tactile personality with a remarkably realistic stone effect. The StepWise technology enhances the soft-touch surface with anti-slip properties, making it ideal for crafting unique atmospheres in both indoor and outdoor settings, whether in restoration projects or contemporary spaces.
